

Security Project: Marking Schedule

IN618 Security

On this project your assessment will be based on the correctness, thoroughness, and quality of the report document that you submit. The following rubric will be used for marking.

Application testing

All inputs and actions tested thoroughly	20 marks
Most tested	15
Some tested, or some gaps in testing	10
Testing significantly lacking	5

Code review

All vulnerabilities (or their lack) identified in code	10 marks
Most identified	7
Some identified	4
Few identified	2

Analysis of user data handling

Complete and accurate analysis	5 marks
Mainly complete and accurate	3
Analysis significantly lacking	1

Server configuration analysis

Complete and accurate analysis	5 marks
Mainly complete and accurate	3
Analysis significantly lacking	1

Recommendations for remediation

Comprehensive recommendations provided	5 marks
Some useful recommendations provided	3
Major gaps in recommendations	1

Document quality

It is expected that your report document will be well formatted, clearly and concisely written, and free of errors in spelling, punctuation, and grammar.

Document fully meets standards	5 marks
Document largely meets standards	3
Significant problems with document quality	1
